

Investor Presentation

TOMRA is well-positioned towards megatrends

1 Pioneer in sensor-based and digital technologies

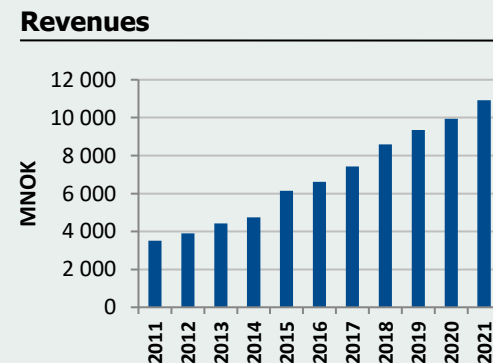

2 Leading market position – fit for growth

3 Solutions for optimal resource productivity

4 Strong financial performance, people & culture

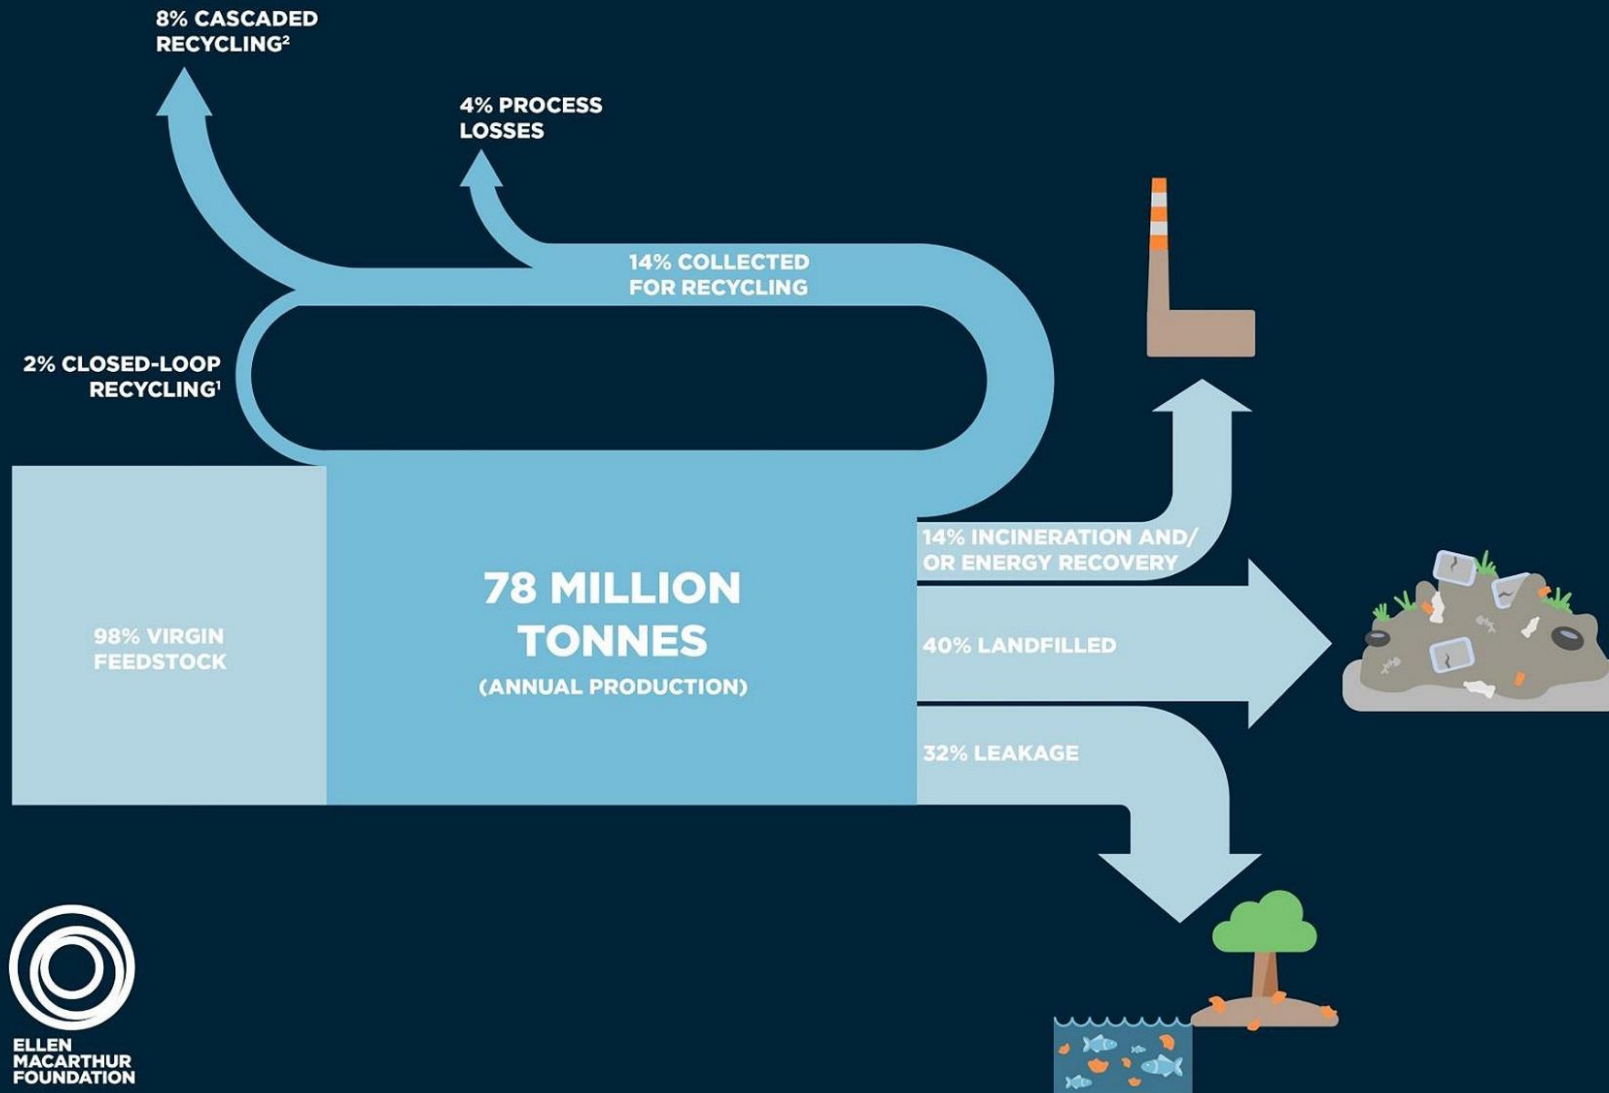

DID YOU KNOW?

- By 2025 solid waste generation will **increase by 70%** compared to 2010 levels
- **32%** of all plastic packaging made **ends up in nature** every year
- **20%** of plastic packaging could be **profitably re-used** and **50%** could be **profitably recycled** if designed for after use systems
- Continuing current practices there will be **more plastic than fish** in the ocean by 2050

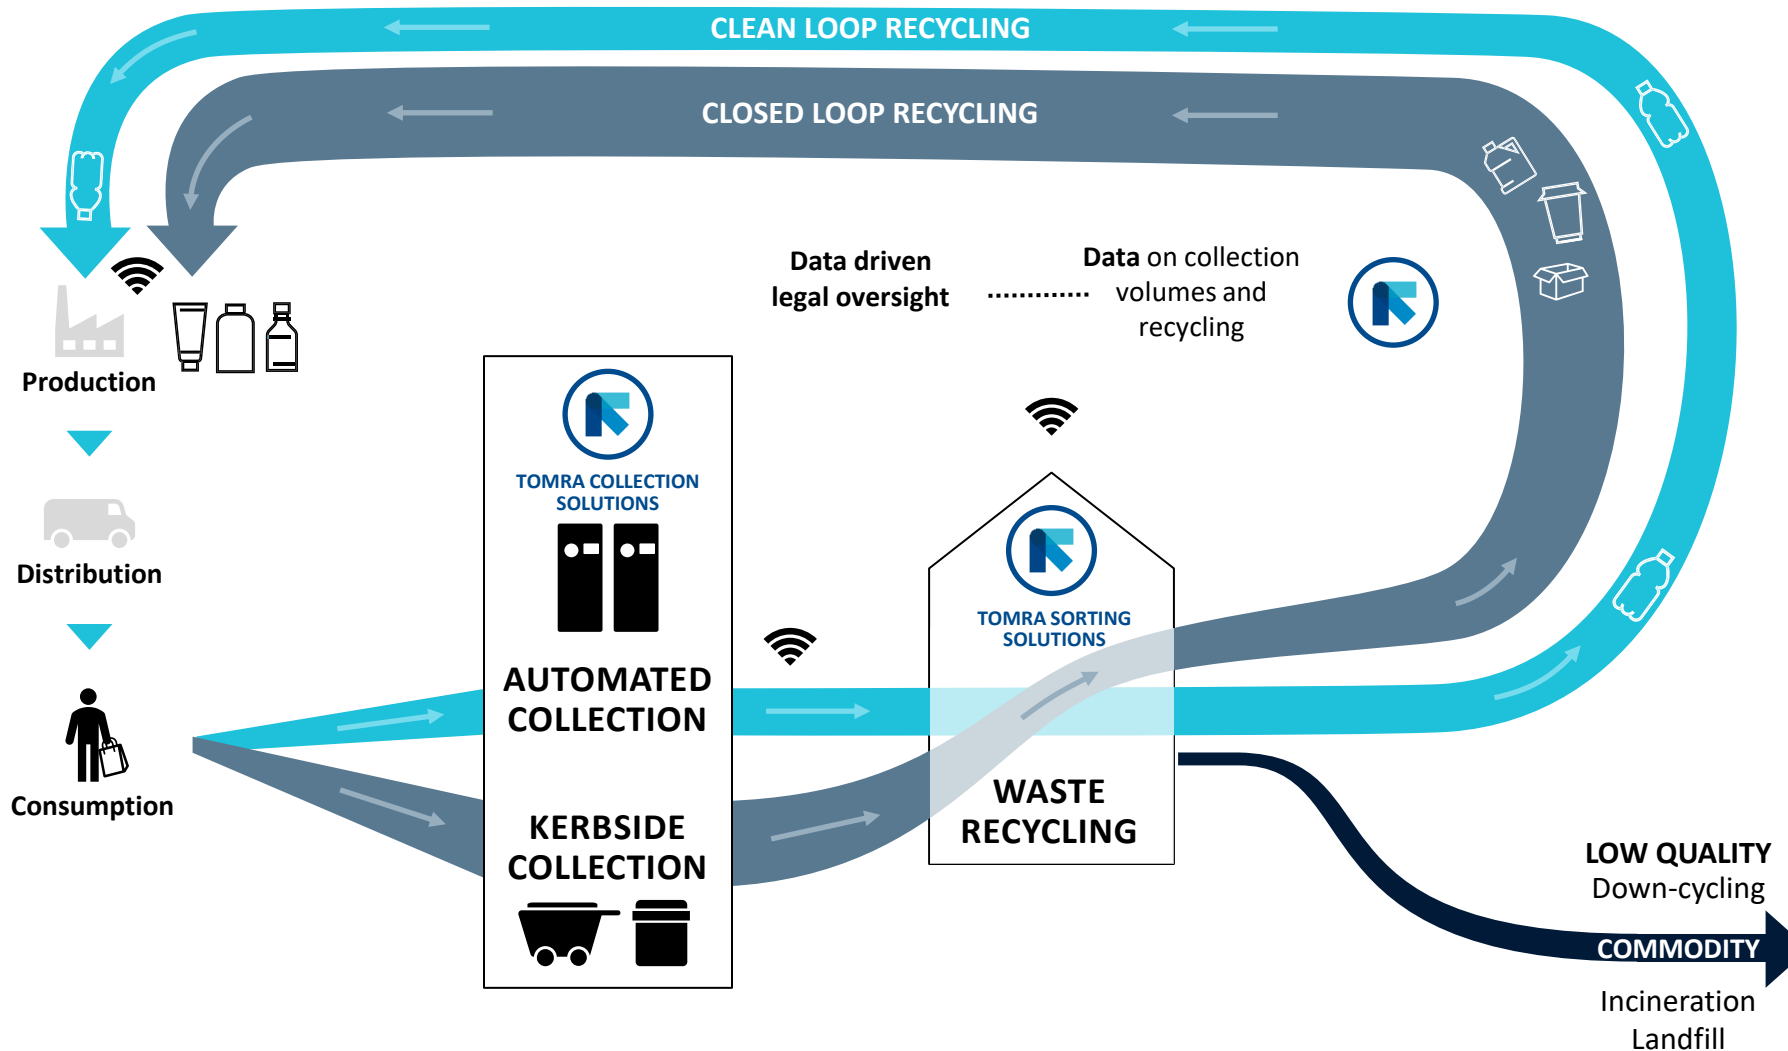

Only 2% of the planet's annual plastic packaging production is reused for the same/similar products

OUR AMBITION:
40% Collected for Recycling
30% Closed Loop Recycling

Circular economy – redefining value creation

Business case for plastics

Value increase

2.5-7x

€1400 per ton
Clear PP/PE

€1000 per ton
Clear PET

€500 per ton
Mixed PET

€200 per ton
Mixed Plastic

DID YOU KNOW?

- By 2050, a global population of **9.8 billion** will **require 70%** more food than is consumed today
- We are currently **wasting 33%** of global food production
- The food industry accounts for around **10%** of global GDP
- Agriculture accounts for **20%** of global greenhouse gas emissions

New ways of feeding a fast-growing DEMANDING population...

To ensure an efficient food production there is an increased need to...

...AUTOMATE...CONTROL...AND INNOVATE

**PROTECTING
BRAND VALUE,
ENHANCING FOOD
QUALITY & SAFETY**

**...THROUGHOUT THE
VALUE CHAIN**

PRODUCTION

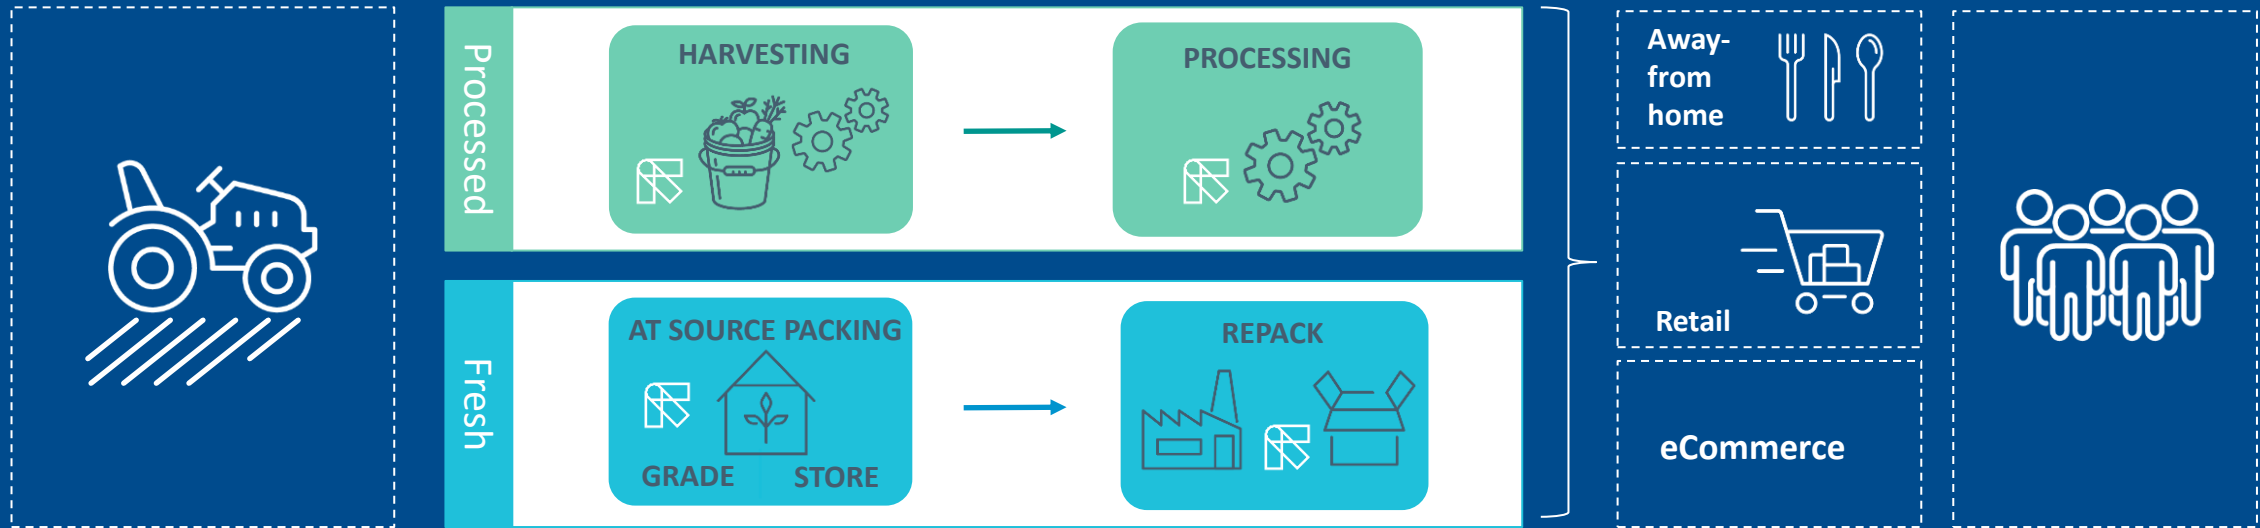

DISTRIBUTION

CONSUMPTION

TOMRA plays an integral part in the food value chain

DATA GENERATED THROUGH THE VALUE CHAIN SERVE MULTIPLE PURPOSES

At TOMRA, our company vision is Leading the Resource Revolution

It is our belief that businesses have the power, responsibility, and vested interest to help manage our planet's precious resources—today and tomorrow.

TOMRA commits to ensure positive sustainability impact both internally and externally

TOMRA'S SUSTAINABILITY STRATEGY

TOMRA has in 2020 undertaken work to update its sustainability strategy, to prioritize and focus corporate sustainability efforts where they matter most and will have the greatest impact towards both external and internal sustainability outcomes.

A key result of the strategy process has been the formulation of three overarching Group sustainability commitments, to ensure and inspire sustainability in our **solutions, operations, and relationships**.

Solutions

TOMRA commits to create lasting environmental and social value through our products and services, driving optimal resource productivity in the sectors that we serve

Operations

TOMRA commits to operate responsibly to minimize any negative sustainability impacts, internalizing social and environmental considerations in the way that we do business

Relationships

TOMRA commits to operate with integrity and fairness to be an employer of choice and a trusted business partner, inspiring sustainability in all our relations

TOMRA COLLECTION

DID YOU KNOW?

- 1 million plastic bottles are bought around the world every minute
- Less than half of all purchased plastic bottles are collected for recycling
- Approximately 42bn beverage containers are captured by TOMRA every year...
- ...representing only less than 3% of all beverage containers sold in 2018

But the tides are shifting. There is a desire for change

Consumer demand for responsible plastic use options

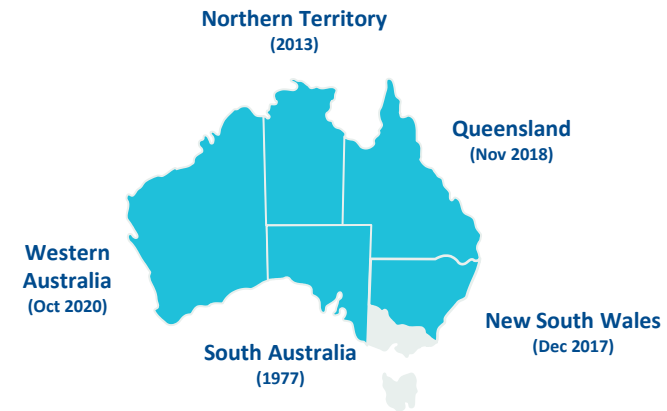

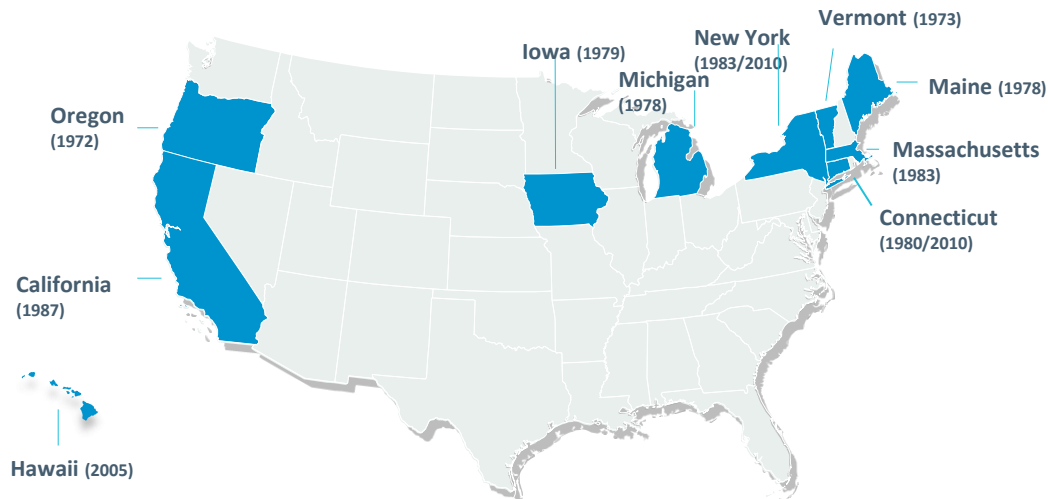

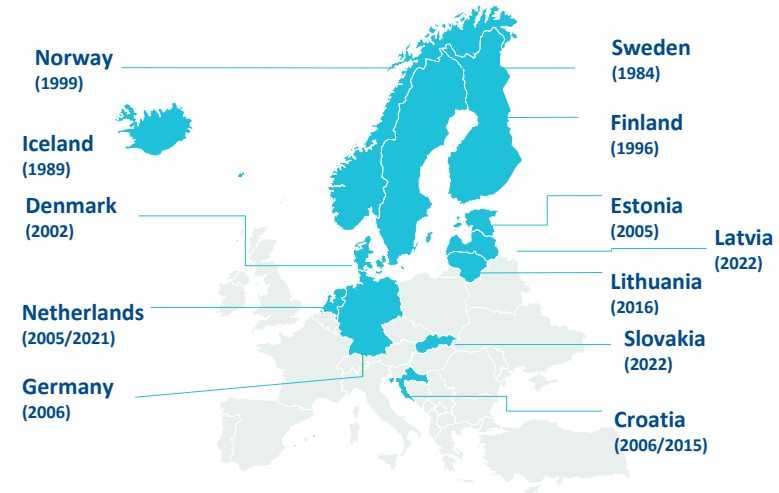

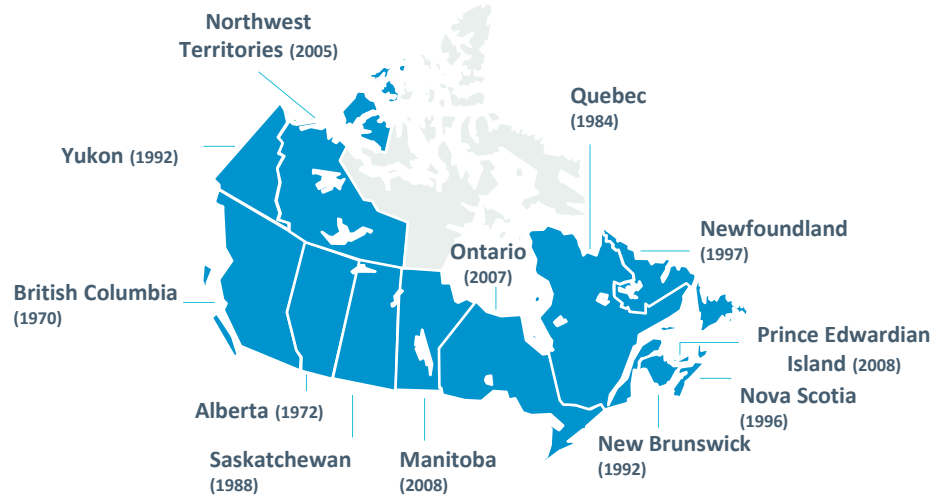

Legislative push for new plastic waste strategies

Market pull from large brand owners and beverage companies

An overview of current deposit markets*

* In addition, some markets have refillable deposit systems such as: Austria, Belgium, Chile, Czech Republic, France, Hungary, Poland and South Korea

Upcoming deposit markets on the move

Quebec:

Deposit Return System to be implemented 2022/2023

Scotland:

Container deposit scheme planned to start August 2023

Connecticut:

Expansion of existing deposit system in 2024.

Ireland:

Deposit Return System to be implemented 2022/2023

England:

Consultation ongoing for a deposit scheme anticipated to be implemented in 2024.

Romania:

Deposit Return System to be implemented 2022/2023

Australia:

NSW introduced deposit from December 2017
QLD introduced deposit from November 2018
WA introduced deposit from October 2020

Austria:

Deposit Return System to be implemented 2025

EU Single-Use Plastic Directive:

Targets on recycled content and collection target for plastic bottles. Deposit scheme mentioned as a mean to reach those targets.

Collection target for plastic bottles:

- 77% by 2025
- 90% by 2029

Recycled content in product design:

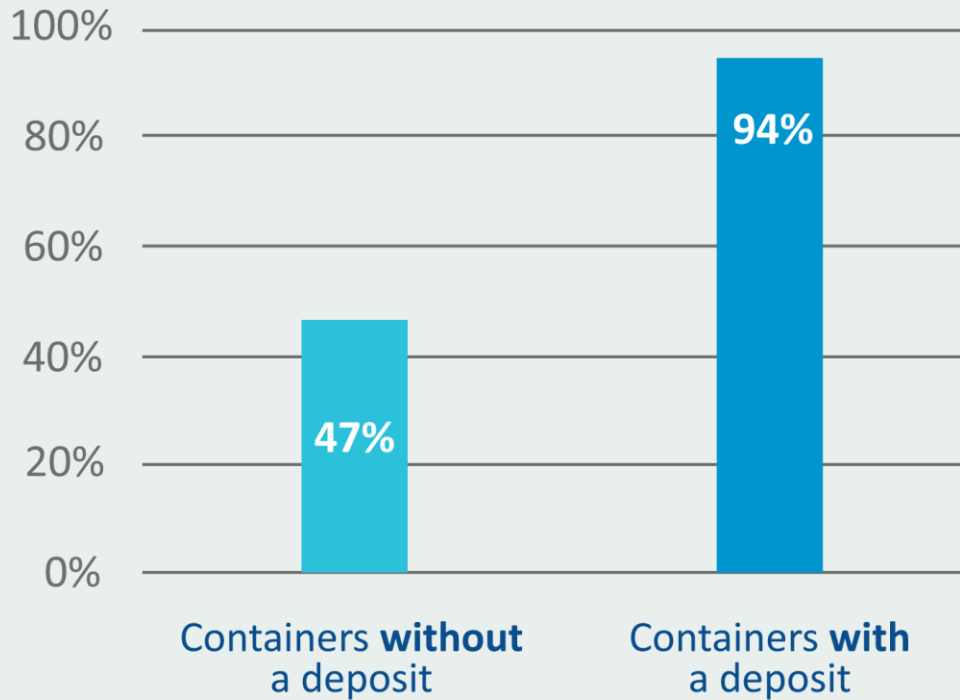

- 25% by 2025 in PET bottles
- 30% by 2030 in all plastic bottles

Victoria and Tasmania:

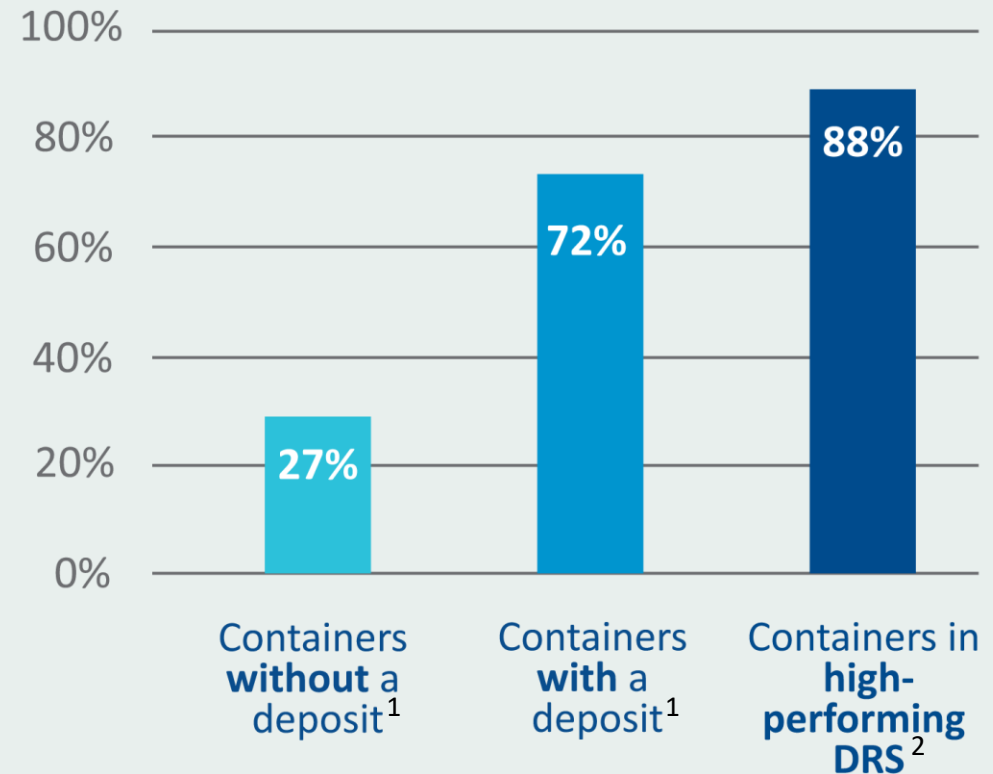

Deposit Return System to be implemented in 2023

Deposit return systems are extremely effective at capturing items for recycling

PET Plastic Beverage Container Collection for Recycling Rates – **Europe** Average

Beverage Container Collection for Recycling Rates – **USA** Average

Compiled from deposit System Operators and “PET Market in Europe: State of Play,” Eunomia. 2020. Data available upon request.

² Michigan and Oregon. Bottlebill.org. 2021

High collection rates achieved in two years' time

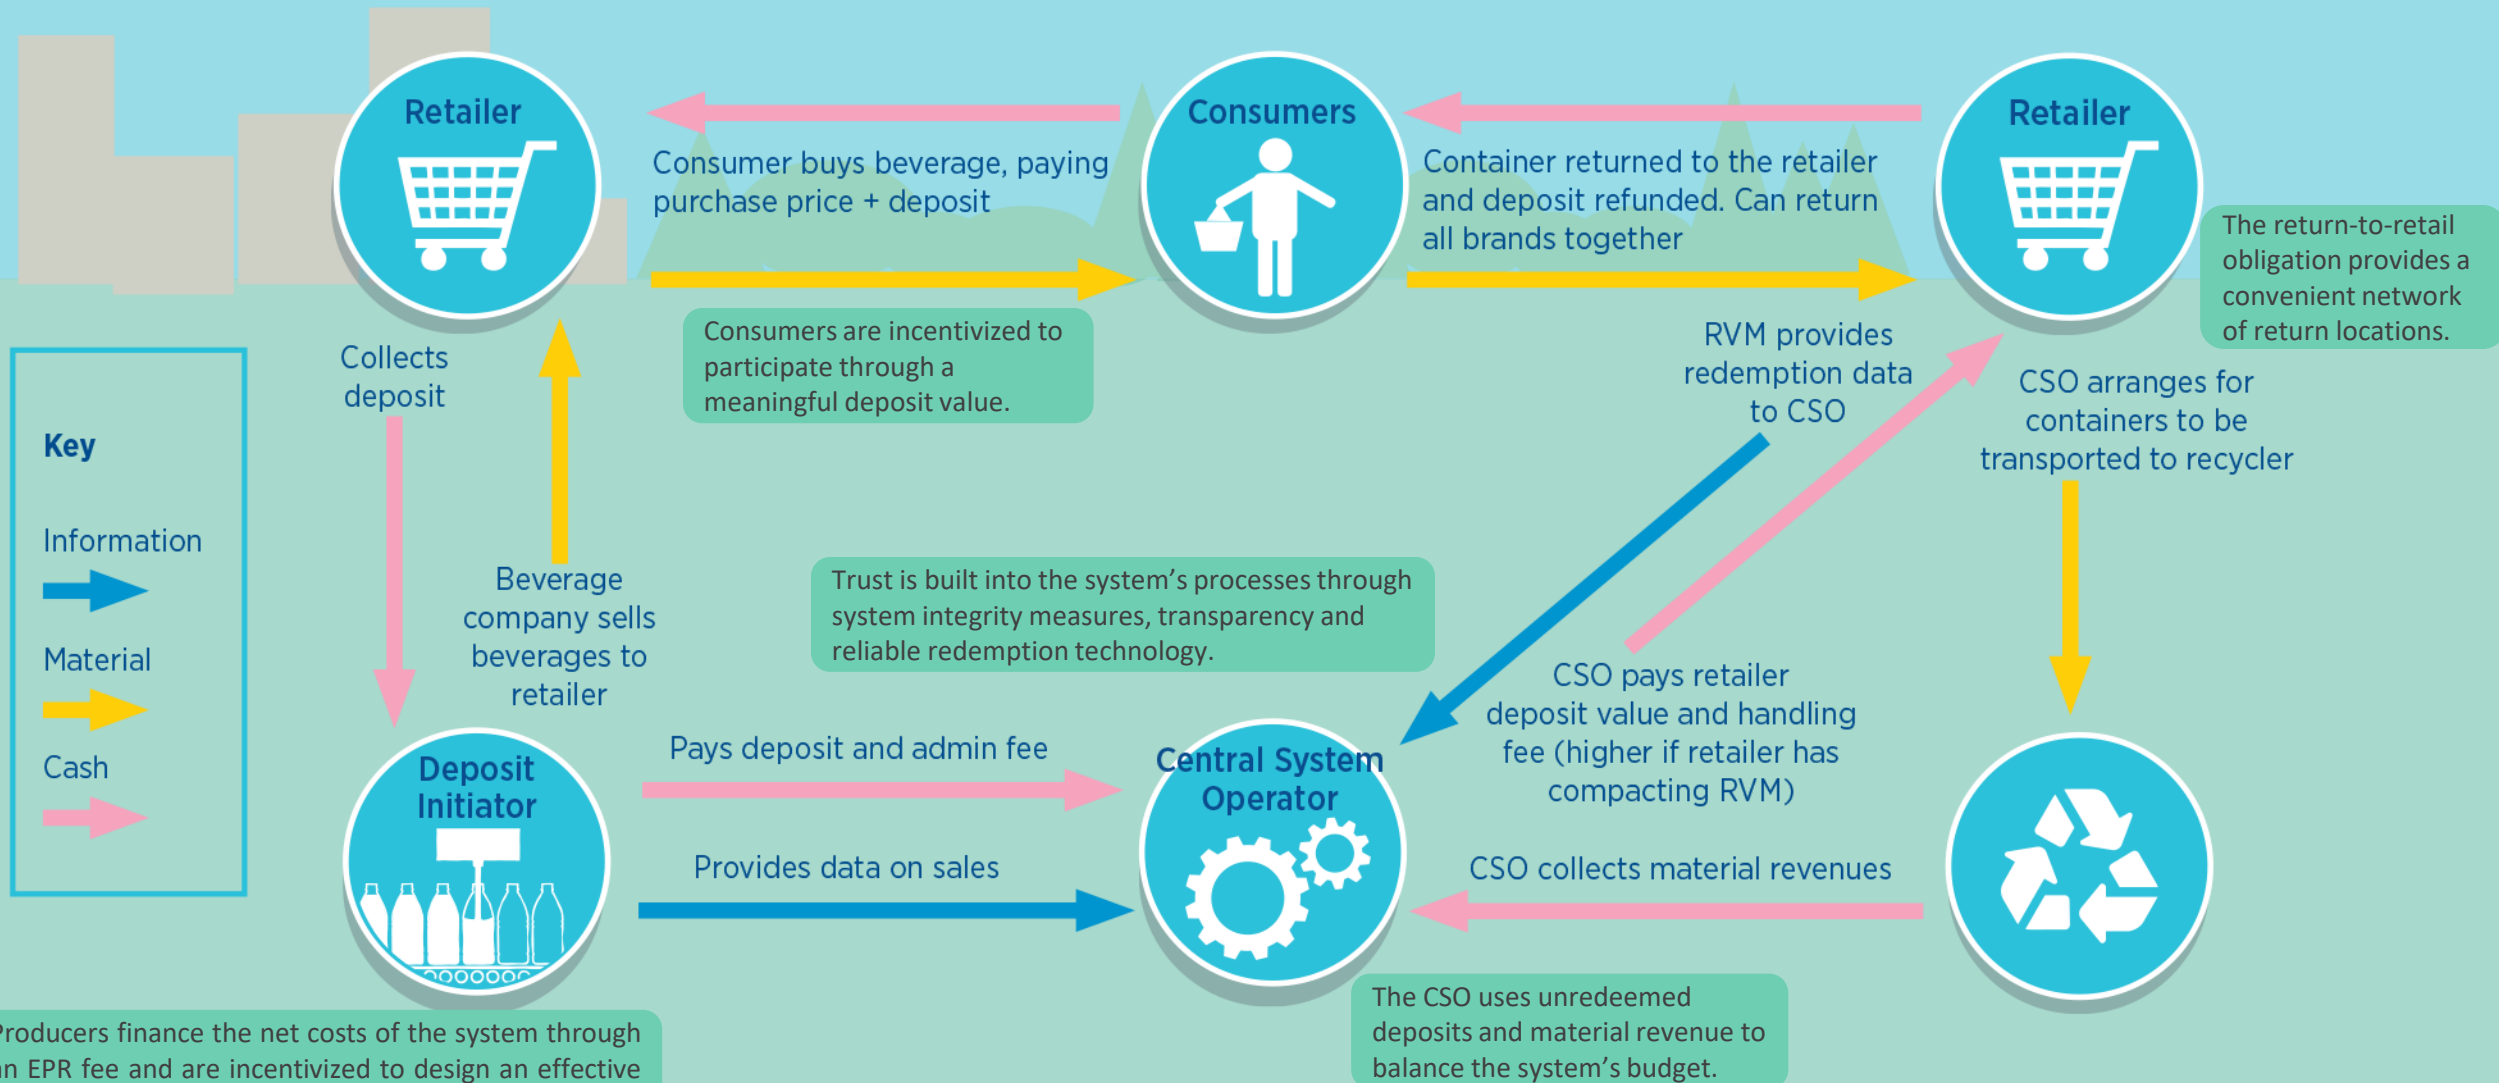

- Return rate and deposit value* for various container deposit schemes

*Deposit values converted to EUR for comparison purpose

The centralized DRS model: How it works

Reinvestment of
unredeemed deposits
and material revenue
within the system

In Norway
over 80% of the
system's costs are
covered by
unredeemed deposits
and material revenue

**Profit and loss overview of Norway's
Central System Administrator (2019)**

Recycled content requirements complement deposit return systems

Market values for recycled material are volatile, making investment in collection/recycling risky

Lack of a stable market leads to a lack of supply for high-quality recycled material

Content requirements raise and stabilize a key funding stream for the DRS: commodity value

EU Single-Use Plastics Directive targets for plastic beverage bottles

Collection targets for plastic beverage bottles

Targets for recycled content in plastic beverage bottles

* 2025 target for PET beverage bottles only, 2030 target for all plastic beverage bottles.

DRSs ensure containers consumed in a region are collected for recycling

Recycled content requirements ensure new bottles are made from recycled material

The four principles of high-performing deposit return systems

PERFORMANCE

A collection target for a broad scope of beverage packaging plus a meaningful deposit **delivers strong results.**

CONVENIENCE

The redemption system is **easy, accessible and fair** for everyone.

PRODUCER RESPONSIBILITY

Producers manage, finance and invest in the system with use of unredeemed deposits and commodity revenues.

SYSTEM INTEGRITY

Trust is built into the system's processes through transparent management, a data-driven clearinghouse, and reliable redemption technology.

Reverse vending technology in a high performing DRS

User communication

Recognition system

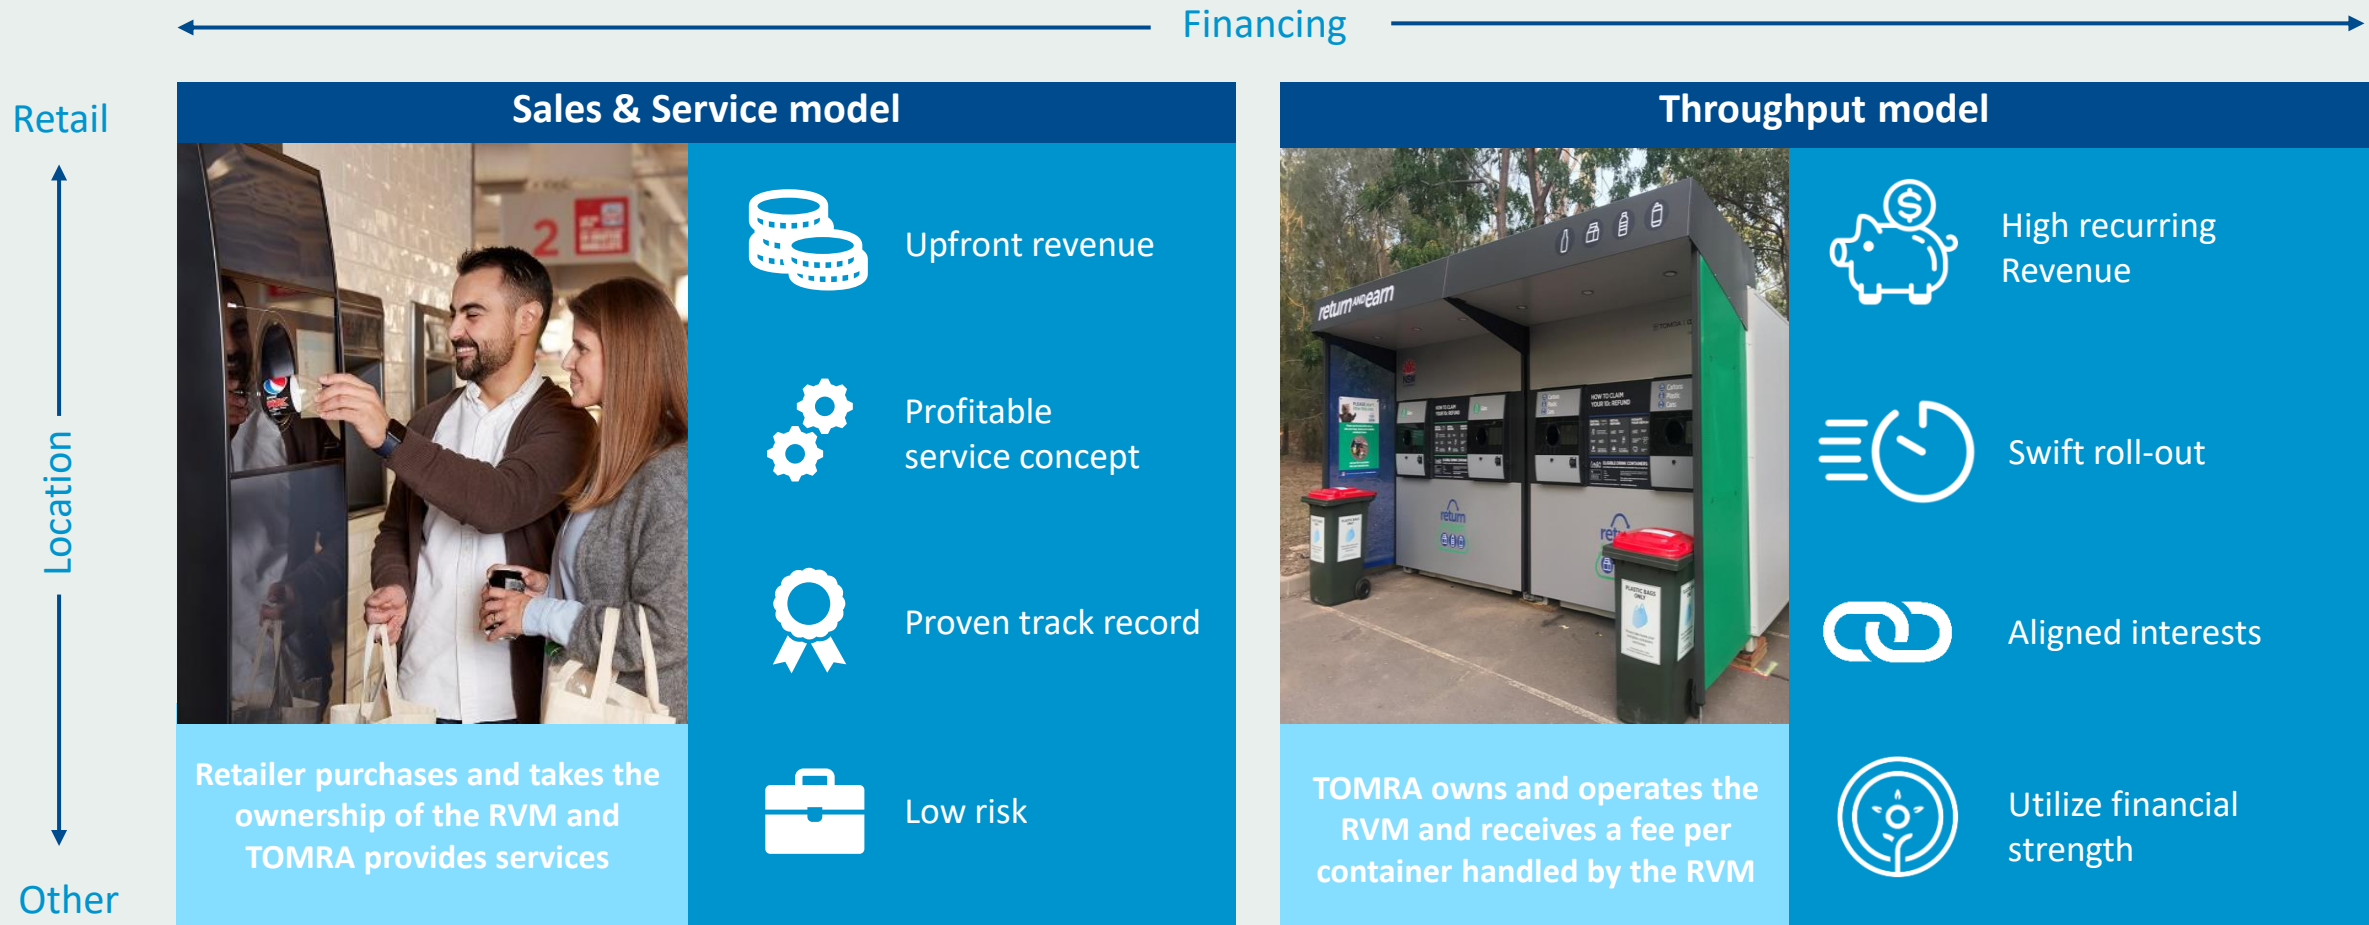

Sorting & processing

Data administration

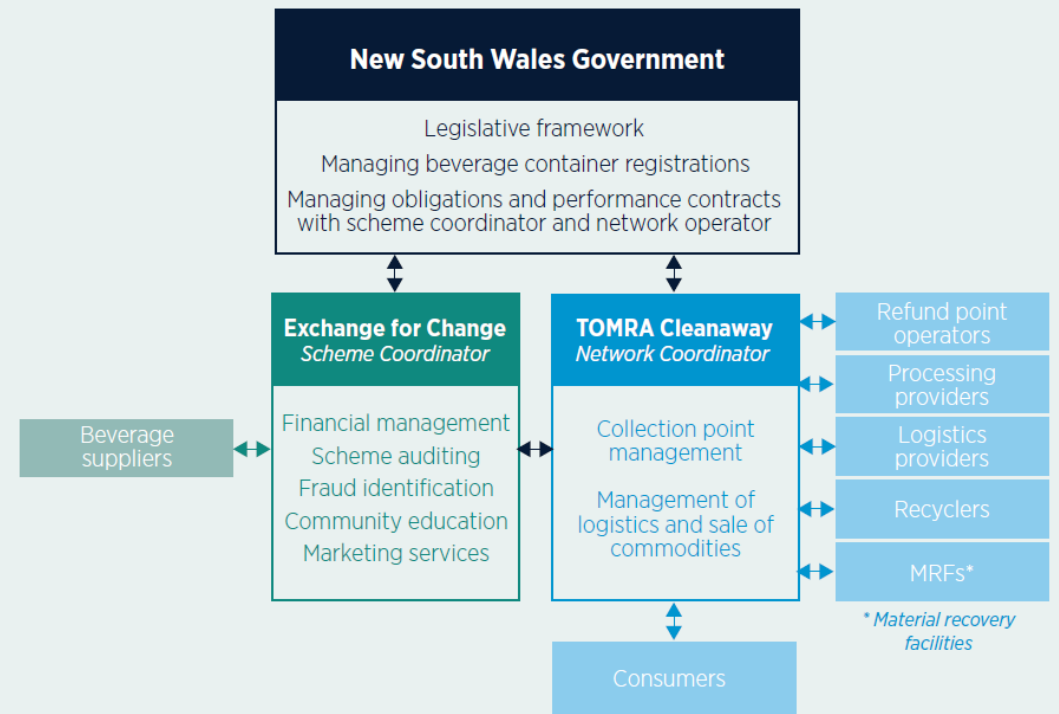

Business model expertise across deposit systems

A "split-responsibility" model is when a network operator provides redemption points and ensures recycling

Roles and responsibilities in the New South Wales Australia deposit return system

Cash flow profiles of the two business models

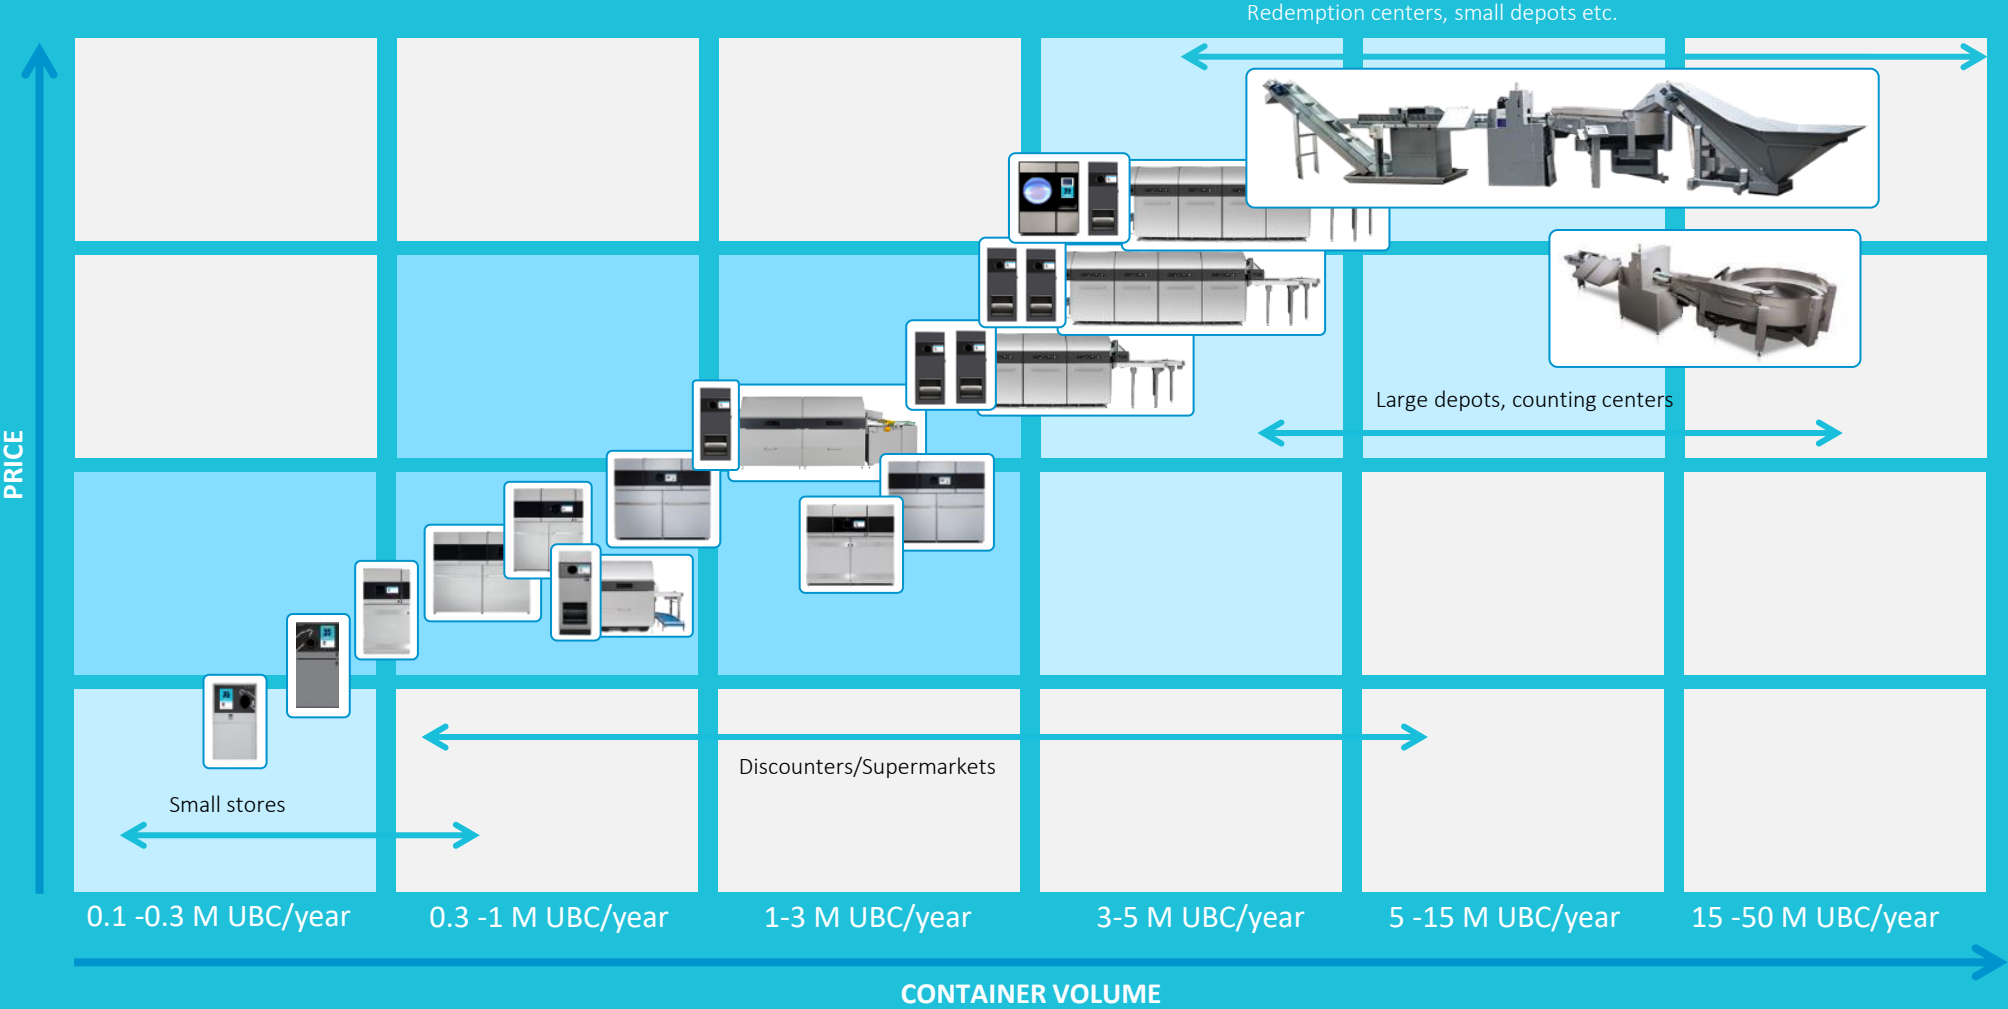

Illustrative cash flow profiles per machine

Throughput model return profile

-  Higher CAPEX needs
-  Up-front investment
-  Bigger risk
-  More responsibility
-  Higher net present value

Flexibility and scalability to enable new business models and new market entry

Advanced digital platform leveraged across stakeholder groups

Market leader in reverse vending solutions

TOMRA RECYCLING MINING

How does sensor-based separation work?

Feeding of unsorted material

High-tech sensors to **identify objects**

Automated sorting process using different sensors for different sorting tasks

Precise ejection by ultra fast air jets

Product specific equipment design often including multiple technologies to maximize sorting efficiency

High-speed processing of information (material, shape, size, color, defect, damage and location of objects)

Automation with TOMRA units

Sorting of Municipal Solid Waste, Cyprus

A common sensor-based technology portfolio

	RECYCLING	MINING	FOOD
ELECTROMAGNETIC SENSOR (EM) Electro-magnetic properties like conductivity and permeability	X	X	X
LED SPECTOMETRY (LED) Color and spectral properties based on multiple LED light sources in very high optical resolution	X	X	X
NEAR-INFRARED SPECTROSCOPY (NIR) Specific and unique spectral properties of reflected light in the near-infrared spectrum	X	X	X
VISIBLE LIGHT SPECTROMETRY (VIS) Specific and unique spectral properties of reflected light in the visible spectrum	X	X	X
X-RAY TRANSMISSION (XRT) Atomic density irrespective of surface properties and thickness	X	X	X
LASER INDUCED BREAKDOWN SPECTROSCOPY (LIBS) Elemental composition	X		
X-RAY FLUORESCENCE (XRF) Elemental composition	X	X	
INFRARED TRANSMISSION (IRT) Density and shape properties by light absorption			X
IR CAMERA (IR) Heat conductivity and heat dissipation			X
COLOR CAMERA (COLOR) Color properties measured in very high optical resolution	X	X	X
LASER REFLECTION/FLUORESCENCE (LASER) Structural, elemental and biological properties by reflection, absorption and fluorescence of laser light	X	X	X

Recycling: applications and sensor technology

MUNICIPAL SOLID WASTE

Recycling: competitive landscape

TOMRA competitive positioning

- Largest installed base
- Highest revenues
- Broadest technology platform on WR
- Highest number of applications and markets served
- Leading brand
- **Market share: 55-60%**

Mining: competitive landscape

TOMRA competitive positioning

- Wide geographical coverage
- Broadest technology platform
- Leading brand
- **Market share: 40-50%**

RESOURCES ARE FINITE

- **Today:** we are paying to get rid of our waste through landfill fees and incineration
- We are wasting perfectly good materials that can be reused
- **Tomorrow:** The Circular Economy is a driver for change
- Creating **value out of waste**
- That is what the **Circular Economy** is all about

The circular economy drives a legislative push...

Continued ambitious EU regulations and recycling targets:
Attract capital and drives investments

European Commission

CIRCULAR ECONOMY
Closing the loop
AN AMBITIOUS EU CIRCULAR ECONOMY PACKAGE

“A common EU target for recycling 70% of packaging waste by 2030”

The Strategy also highlights the need for specific measures, possibly a legislative instrument, to reduce the impact of single-use plastics, particularly in our seas and oceans

- **From Green Fence to National Sword:** Short-term demand for recycling solutions in waste exporting countries

- Limits the import of contaminated recyclable commodities and increases inspections of recyclable commodity imports
- Purity level set to 99.5%

...promoting recycling

2018 CIRCULAR ECONOMY PACKAGE

	Description	Targets and measures
Waste Framework Directive	<ul style="list-style-type: none"> Rules on how waste should be managed in the EU. It provides general principles for doing so, such as the Waste Hierarchy, Polluter Pays Principle and Extended Producer Responsibility. 	<ul style="list-style-type: none"> A common EU target for recycling 60% of municipal waste by 2030 A common EU target for recycling 70% of all packaging waste by 2030 A common EU target for recycling 55% of all plastics by 2030 A binding landfill target to reduce landfill to maximum of 10% of municipal waste by 2030 Minimum requirements are established for extended producer responsibility schemes Simplified and improved definitions and harmonized calculation methods for recycling rates Concrete measures to promote re-use and stimulate industrial symbiosis Economic incentives for producers to put greener products on the market and support recovery and recycling schemes
Packaging and Packaging Waste Directive	<ul style="list-style-type: none"> Rules on the production, marketing, use, recycling and refilling of containers of liquids for human consumption and on the disposal of used containers 2015 revision includes lightweight plastic carrier bags 	
Waste Electrical and Electronic Equipment (WEEE) Directive	<ul style="list-style-type: none"> Collection, recycling and recovery targets for all types of electrical goods 10 categories: Large household appliances, Small household appliances, IT and telco equipment, Consumer equipment, Lighting equipment, Electrical and electronic tools, Toys, Leisure and sports equipment, Medical devices, Monitoring and control instruments, Automatic dispensers 	
Landfill Directive	<ul style="list-style-type: none"> The objective of the Directive is to prevent or reduce as far as possible negative effects on the environment from the landfilling of waste In particular: impact on surface water, groundwater, soil, air, and on human health by introducing stringent technical requirements for waste and landfills. 	
End of Life Vehicle (ELV) Directive	<ul style="list-style-type: none"> Aims at reduction of waste arising from end-of-life vehicles The scope of the directive is limited to passenger cars and light commercial vehicles 	

...and a market pull

The Coca-Cola Company

Large companies committing to use recycled raw materials = increased demand for recycled offtake

Circular Economy – Innovating through collaboration

TOMRA and Borealis, in collaboration with Zimmermann, opened a demo plant for advanced mechanical recycling with the purpose of generating material for brand owners and converters to qualify, validate and prove fit for use in their applications.

The demo plant covers the process from post consumer waste to production of recycled polymers.

PET	PE	PE	PE	PP	PP	PVC	PUR	PS	Other
8%	30%			19%		10%	8%	6%	19%

PET is the main polymer type in the market for high quality recycled plastics. However, PET accounts for less than 10% of plastic packaging*. Proving other polymer types is an important enabler of plastic circularity.

“One major challenge towards more circular packaging is the availability of high-quality recycled plastics that can be used in the packaging of our brands.”

Dr. Thorsten Leopold, Director International Packaging Technology Home Care Henkel

Recycling: market growth expectations

MARKET DEFINITION RECYLING

Sensor-based sorting equipment

- excluding cullet glass sorting
- excluding peripheral equipment and turn-key solutions

AFFECTING FACTORS

Tightening regulation

Access to capital

Consumer awareness

Commodity price fluctuations

Political instability (emerging markets)

Emerging countries ban

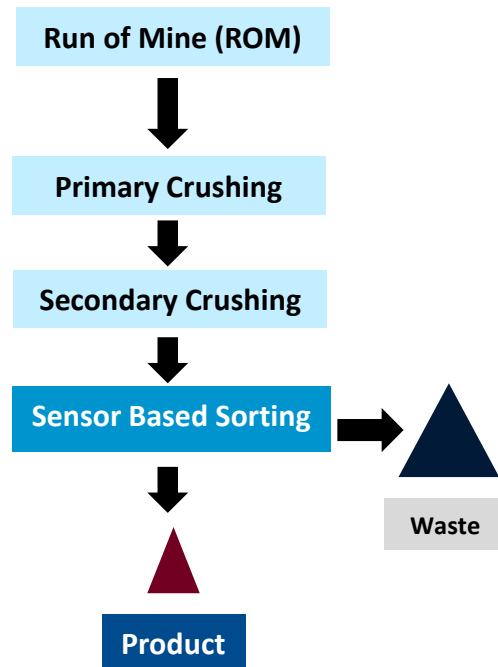

INTELLIGENT MINE

- **Mining** is an old industry. But chances are that it will **look very different** in 10 years time
- Energy intensity and water stress are major drivers...
- **...for disruptive technology forces to reshape the industry**
- Commodity prices and capex impact the investment sentiment

The concept of sensor-based sorting in mining

Mining process: Industrial minerals

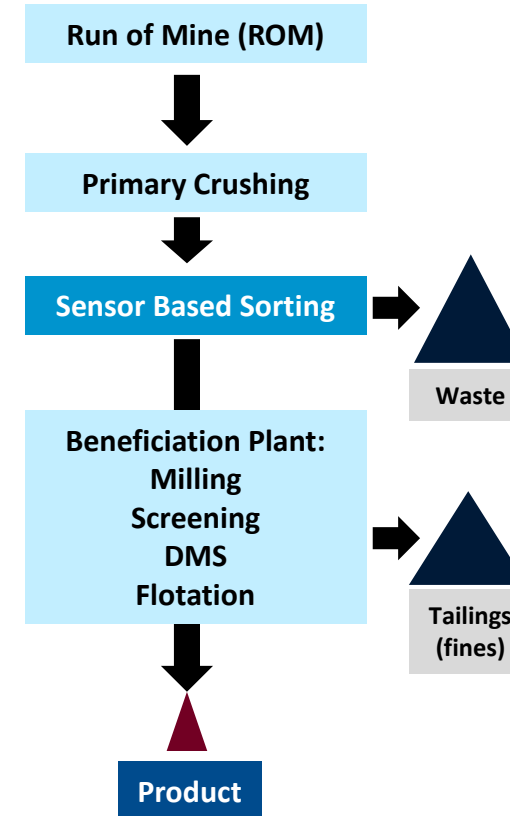

Current segment

- 15% to 50% of the ROM can be rejected in an early stage of the process (application dependent)
- These low grade waste rocks don't need to be transported, crushed, grinded or further treated

Mining process: Metal mining

Potential new segment

Mining: market growth expectations

Total annual market size

MARKET DEFINITION MINING

Sensor-based sorting equipment

- is still a technology to be accepted
- growth is conditional on new applications and technologies being developed

AFFECTING FACTORS

Political climate

Access to capital

Cost drivers

Commodity price
fluctuations

TOMRA FOOD

FOOD FOR THOUGHT

- We will need more food in the next 40 years than **all the harvests in history combined**
- But **farmland is constant** – at best
- The food you eat will have **travelled more than you have**

Automation continues on a strong growth trajectory

From...

To...

Robotics become cheaper, more advanced and user-friendly

Higher labor cost and labor shortages

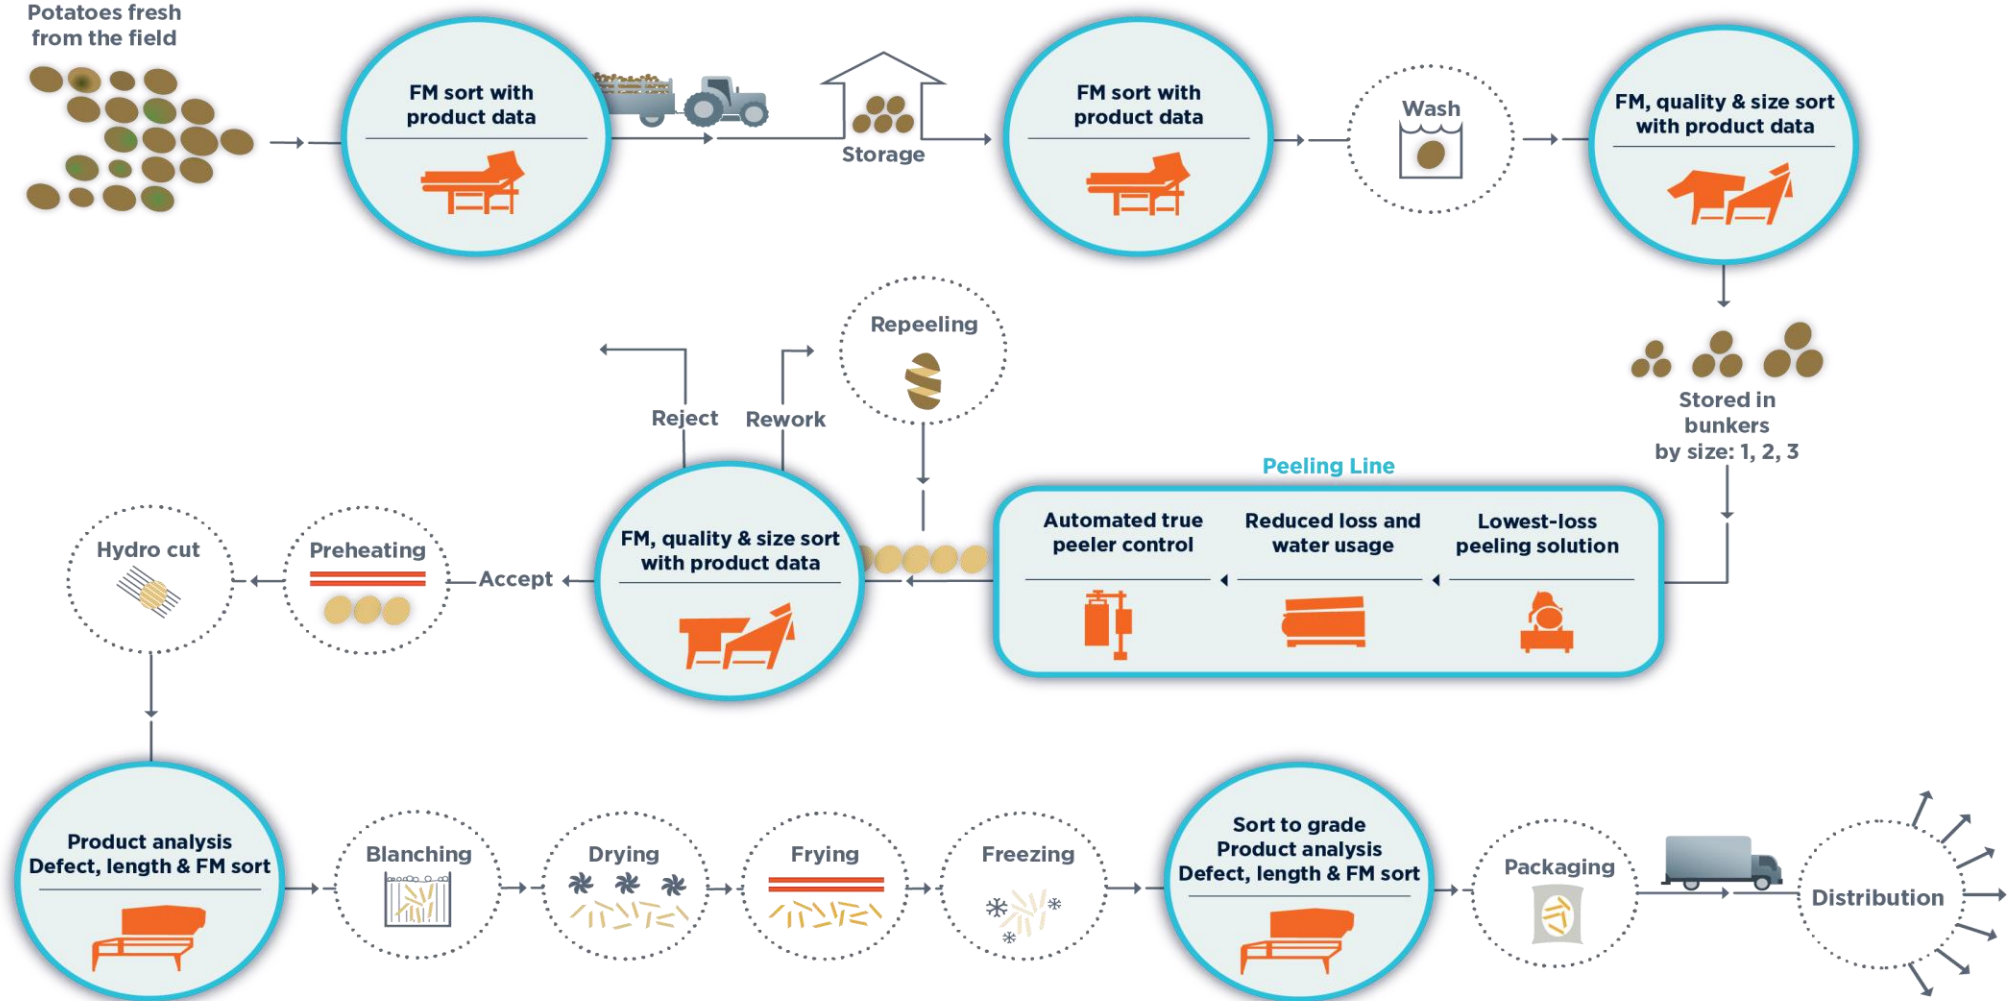

Ensure quality and safety

Improve efficiency

Leverage data insight

Creating value in various parts of the food process

Food: applications and sensor technology

POTATOES

Chips, French fries, peeled, specialty products, sweet potatoes, unpeeled, washed

LASER, CAMERA, BSI, PULSED LED

VEGETABLES

Beans, beets, broccoli, carrots, corn, cucumbers, industrial spinach, IQF vegetables, jalapenos/peppers, onions, peas, pickles

LASER, CAMERA, BSI, PULSED LED

NUTS

Almonds, cashews, hazelnuts, macadamias, peanuts, pecans, pistachios, walnuts

LASER, CAMERA, X-RAY

DRIED FRUIT

Apricots, cranberries, dates, figs, prunes, raisins

OTHERS

Gummies, Tobacco

LASER, CAMERA

Our products are detecting a wide range of parameters

Color

Removal of discolorations in mono- and mixed-color material

Blemishes

Objects with spots or other (small) blemishes are removed

Defects

Removal of visible and invisible small and substantial defects

Structure

Removal of soft, molded or rotten food

Density

Detection of density differences

Damage

Broken, split and damaged objects are detected and removed

Shape & Size

Sort on length, width, diameter, area, broken-piece recognition, ...

Biometric Characteristics

Sort based on water content and removal of mycotoxin contaminations

Foreign Material

Removal of foreign material in a material stream, e.g. insects, worms, snails or plastics in food applications

Fluo

Based on the chlorophyll level present in produce defects are removed

X-RAY

Analysis of objects based on their density and shape

Detox

Removal of produce contaminated with aflatoxin

Visible

Invisible

A close-up photograph of a complex, perforated metal structure, possibly a heat exchanger or a similar industrial component. The structure is composed of numerous interconnected metal plates or tubes, creating a dense, lattice-like pattern. The lighting is dramatic, with strong highlights and deep shadows, giving the structure a three-dimensional appearance. The background is a soft, out-of-focus blue, which complements the metallic tones of the structure. A dark horizontal band is overlaid across the middle of the image, containing the title text in white.

HISTORICAL GROUP FINANCIALS AND TARGETS

Important factors that could cause actual results to differ materially from those expectations include, among others, changes in economic and market conditions in the geographic areas and industries that are or will be major markets for TOMRA Systems ASA. Although TOMRA Systems ASA believes that its expectations and the Document are based upon reasonable assumptions, it can give no assurance that those expectations will be achieved or that the actual results will be as set out in the Document. TOMRA Systems ASA does not guarantee the accuracy, reliability or completeness of the Document, and TOMRA Systems ASA (including its directors, officers and employees) accepts no liability whatsoever for any direct or consequential loss arising from the use of this Document or its contents. TOMRA Systems ASA consists of many legally independent entities, constituting their own separate identities. TOMRA is used as the common brand or trademark for most of these entities. In this Document we may sometimes use "TOMRA", "TOMRA Systems", "we" or "us" when we refer to TOMRA Systems ASA companies in general or where no useful purpose is served by identifying any particular TOMRA Company.
